

The Group Intellect Responds to "What if?"

Americans are awakened to the question- What's in a name?

The CWSC are interviewing educators; anthropologists; architects; laborers; mothers and fathers-why? National-A representation of the " group intellect " better known as The Community Wide Shuraa Conference or CWSC, is calling on citizens to dedicate their cities, communities, neighborhoods, etc. throughout the United States of America, for the covenant of human excellence...

This group intellect is assessing everyday life by opening the diverse doors for human involvement. They, CWSC, are establishing live interactive formats, street by street, neighborhood by neighborhood, wherever there is human life. Statistics show that all ages capable of engaging in a conversation and working on some endeavor of a neighborly need, is rising early in the mornings. They are coming out from their homes with pen and paper; microphones, cameras, recorders, journals, etc. capturing the historic connectivity, communication, respect, constructive activity, you name it.

People are stopping throughout the day to take a moment to commune with their respect for The Creator of us all. Cities are now remarkably, one by one, taking on names, of servitude, attributed to The Creator. Imagine- Jamestown, Virginia-with history in tact, is now known as ABDUR-RAHMAN; St. Petersburg, Florida now known as ABDUSH-SHAKOOR; Los Angeles California now known as ABDUL MALIK; New York, New York is now known as ABDUR-RAHEEM.

The humbling effect has affected countries abroad, Haiti is now known as ABDUS-SALAAM and Jamaica is now known as ABDUL HAQQ, and last but not least Shanhai, China is now known as ABDUL-ALEEM! The question is " what's in a name"? I say it's the influence of LAA ILLAHA ILLAA ALLAH - Muhammadur rasullullah.....so we say What If?-- Martha Nailah Williams- founder/director of KNOW ME /no me Institute, FL
